Claims 9-11 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper Nos. 6 and 8.

Cancellation of non-elected claims is show required.

Applicant elected the enhanced combination of genistein and vincristin for examination on the merits with traverse in Paper Nos. 6 and 8. Claims 16, 17 and 19-24 are being examined as they read on the elected combination of genistein and vincristin.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 16-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over the Weber et al. patent of record taken with the WO 97/46531 publication of record for the reasons fully set forth in Paper No. 9, pages 3 and 4.

Applicant's remarks on page 11, lines 3-4 that "one skilled in this art could not have expected that isoflavonoids would potentiate cytotoxicity of the conventional cytotoxic agents." This is true but the instant claims fails to recite a "potentiate cytotoxicity" effect.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP
